

Field Day on Invasive Species

Farmers and landowners should be concerned with the invasive species that could be growing on or around their property. Invasive weeds can reduce the amount of desirable vegetation in fields by crowding them out and consuming the water and nutrients. The Howell County SWCD, Natural Resources Conservation Service, Missouri Department of Conservation, and University of Missouri Extension will be hosting a field day to help the landowners identify these weeds and control them. Weeds of interest will include Spotted Kanweed, Multiflora Rose, Musk Thistle, etc.

When: May 5th at 3:00 p.m.

Where: Mike Pace Farm

Topics to be discussed:

Weed Identification

Control Strategies

Sprayer Calibration and Demonstration

Demonstration of Tree Shearer with Sprayer on Bobcat

There is no cost to attend, but we would like a head count for the meal.

Call 417-256-7117 ext 3 by May 3rd to register and get directions to the farm.
